

BAYESIAN STATISTICS THE FUN WAY

UNDERSTANDING STATISTICS
AND PROBABILITY WITH STAR WARS®,
LEGO®, AND RUBBER DUCKS

WILL KURT

BAYESIAN STATISTICS THE FUN WAY

Understanding Statistics and Probability with Star Wars[®],
LEGO[®], and Rubber Ducks

by Will Kurt

PRAISE FOR *BAYESIAN STATISTICS THE FUN WAY*

“An excellent introduction to subjects critical to all data scientists.”

—INSIDE BIG DATA

“This is not a frivolous book. All the math and logic is here and well presented. It’s just that a lot of fun scenarios are used to present the ideas.”

—DAN HANSON, GREAT LAKES GEEK

“The book is an excellent introduction, especially for those of us that have a rough time with advanced math but that want to advance in the data science field.”

—NOTAMONADTUTORIAL.COM

“The writing is no-nonsense, the content is understandable, the examples are engaging, and the Bayesian concepts are explained clearly . . . As a first introduction to Bayesian inference, this book is hard to beat. It nails the key concepts in a compelling and instructive fashion.”

—BAYESIANSPECTACLES.ORG

“A simple yet complete practical introduction to Bayesian inference and statistics.”

—JOSE D. PEREZGONZALEZ, FRONTIERS IN PSYCHOLOGY

“Whether you’re a die-hard statistics fan or someone who has not once dabbled in the field, this book is for you.”

—CHELSEA PARLETT, CMPARLETTPELLERITI.GITHUB.IO

To Melanie, who reawoke in me a passion for words

About the Author

Will Kurt currently works as a data scientist at Wayfair, and has been using Bayesian statistics to solve real business problems for over half a decade. He frequently blogs about probability on his website, *CountBayesie.com*. Kurt is the author of *Get Programming with Haskell* (Manning Publications) and lives in Boston, Massachusetts.

About the Technical Reviewer

Chelsea Parlett-Pelleriti is a PhD student in Computational and Data Science, and has a long-standing love of all things lighthearted and statistical. She is also a freelance statistics writer, contributing to projects including the YouTube series *Crash Course Statistics* and The Princeton Review's *Cracking the AP Statistics Exam*. She currently lives in Southern California.

BRIEF CONTENTS

Acknowledgments

Introduction

PART I: INTRODUCTION TO PROBABILITY

Chapter 1: Bayesian Thinking and Everyday Reasoning

Chapter 2: Measuring Uncertainty

Chapter 3: The Logic of Uncertainty

Chapter 4: Creating a Binomial Probability Distribution

Chapter 5: The Beta Distribution

PART II: BAYESIAN PROBABILITY AND PRIOR PROBABILITIES

Chapter 6: Conditional Probability

Chapter 7: Bayes' Theorem with LEGO

Chapter 8: The Prior, Likelihood, and Posterior of Bayes' Theorem

Chapter 9: Bayesian Priors and Working with Probability Distributions

PART III: PARAMETER ESTIMATION

Chapter 10: Introduction to Averaging and Parameter Estimation

Chapter 11: Measuring the Spread of Our Data

Chapter 12: The Normal Distribution

Chapter 13: Tools of Parameter Estimation: The PDF, CDF, and Quantile Function

Chapter 14: Parameter Estimation with Prior Probabilities

PART IV: HYPOTHESIS TESTING: THE HEART OF STATISTICS

Chapter 15: From Parameter Estimation to Hypothesis Testing: Building a Bayesian A/B Test

Chapter 16: Introduction to the Bayes Factor and Posterior Odds: The Competition of Ideas

Chapter 17: Bayesian Reasoning in the Twilight Zone

Chapter 18: When Data Doesn't Convince You

Chapter 19: From Hypothesis Testing to Parameter Estimation

Appendix A: A Quick Introduction to R

Appendix B: Enough Calculus to Get By

Appendix C: Answers to the Exercises

Index

CONTENTS IN DETAIL

INTRODUCTION

Why Learn Statistics?

What Is "Bayesian" Statistics?

What's in This Book

Part I: Introduction to Probability

Part II: Bayesian Probability and Prior Probabilities

Part III: Parameter Estimation

Part IV: Hypothesis Testing: The Heart of Statistics

Background for Reading the Book

Now Off on Your Adventure!

PART I: INTRODUCTION TO PROBABILITY

1

BAYESIAN THINKING AND EVERYDAY REASONING

Reasoning About Strange Experiences

Observing Data

Holding Prior Beliefs and Conditioning Probabilities

Forming a Hypothesis

Spotting Hypotheses in Everyday Speech

Gathering More Evidence and Updating Your Beliefs

Comparing Hypotheses

Data Informs Belief; Belief Should Not Inform Data

Wrapping Up

Exercises

Evaluation Only. Created with Aspose.Words. Copyright 2003-2026 Aspose Pty Ltd.

2

MEASURING UNCERTAINTY

What Is a Probability?

Calculating Probabilities by Counting Outcomes of Events

Calculating Probabilities as Ratios of Beliefs

Using Odds to Determine Probability

Solving for the Probabilities

Measuring Beliefs in a Coin Toss

Wrapping Up

Exercises

3

THE LOGIC OF UNCERTAINTY

Combining Probabilities with AND

Solving a Combination of Two Probabilities

Applying the Product Rule of Probability

Example: Calculating the Probability of Being Late

Combining Probabilities with OR

Calculating OR for Mutually Exclusive Events

Using the Sum Rule for Non-Mutually Exclusive Events

Example: Calculating the Probability of Getting a Hefty Fine

Wrapping Up

Exercises

4

CREATING A BINOMIAL PROBABILITY DISTRIBUTION

Structure of a Binomial Distribution

Understanding and Abstracting Out the Details of Our Problem

Counting Our Outcomes with the Binomial Coefficient

Combinatorics: Advanced Counting with the Binomial Coefficient

Calculating the Probability of the Desired Outcome

Example: Gacha Games

Wrapping Up

Exercises

5

THE BETA DISTRIBUTION

A Strange Scenario: Getting the Data

Distinguishing Probability, Statistics, and Inference

Collecting Data

Calculating the Probability of Probabilities

The Beta Distribution

Breaking Down the Probability Density Function

Applying the Probability Density Function to Our Problem

Quantifying Continuous Distributions with Integration

Reverse-Engineering the Gacha Game

Wrapping Up
Exercises

PART II: BAYESIAN PROBABILITY AND PRIOR PROBABILITIES

6

CONDITIONAL PROBABILITY

Introducing Conditional Probability
 Why Conditional Probabilities Are Important
 Dependence and the Revised Rules of Probability
Conditional Probabilities in Reverse and Bayes' Theorem
Introducing Bayes' Theorem
Wrapping Up
Exercises

7

BAYES' THEOREM WITH LEGO

Working Out Conditional Probabilities Visually
Working Through the Math
Wrapping Up
Exercises

8

THE PRIOR, LIKELIHOOD, AND POSTERIOR OF BAYES' THEOREM

The Three Parts
Investigating the Scene of a Crime
 Solving for the Likelihood
 Calculating the Prior
 Normalizing the Data
Considering Alternative Hypotheses
 The Likelihood for Our Alternative Hypothesis
 The Prior for Our Alternative Hypothesis
 The Posterior for Our Alternative Hypothesis
Comparing Our Unnormalized Posteriors
Wrapping Up
Exercises

9

BAYESIAN PRIORS AND WORKING WITH PROBABILITY DISTRIBUTIONS

C-3PO's Asteroid Field Doubts
Determining C-3PO's Beliefs
Accounting for Han's Badassery
Creating Suspense with a Posterior
Wrapping Up
Exercises

PART III: PARAMETER ESTIMATION

10

INTRODUCTION TO AVERAGING AND PARAMETER ESTIMATION

Estimating Snowfall

- Averaging Measurements to Minimize Error

- Solving a Simplified Version of Our Problem

- Solving a More Extreme Case

- Estimating the True Value with Weighted Probabilities

- Defining Expectation, Mean, and Averaging

Means for Measurement vs. Means for Summary

Wrapping Up

Exercises

11

MEASURING THE SPREAD OF OUR DATA

Dropping Coins in a Well

Finding the Mean Absolute Deviation

Finding the Variance

Finding the Standard Deviation

Wrapping Up

Exercises

12

THE NORMAL DISTRIBUTION

Measuring Fuses for Dastardly Deeds

The Normal Distribution

Solving the Fuse Problem

Some Tricks and Intuitions

“N Sigma” Events

The Beta Distribution and the Normal Distribution

Wrapping Up

Exercises

13

TOOLS OF PARAMETER ESTIMATION: THE PDF, CDF, AND QUANTILE FUNCTION

Estimating the Conversion Rate for an Email Signup List

The Probability Density Function

- Visualizing and Interpreting the PDF

- Working with the PDF in R

Introducing the Cumulative Distribution Function

- Visualizing and Interpreting the CDF

- Finding the Median
