ADVANCED MATHEMATICS

A TRANSITIONAL REFERENCE

STANLEY J. FARLOW

WILEY

Table of Contents

[Cover](#)

[Preface](#)

[Possible Beneficial Audiences](#)

[Wow Factors of the Book](#)

[Chapter by Chapter \(the nitty-gritty\)](#)

[Note to the Reader](#)

[Keeping a Scholarly Journal](#)

[About the Companion Website](#)

[Chapter 1: Logic and Proofs](#)

[1.1 Sentential Logic](#)

[1.1.1 Introduction](#)

[1.1.2 Getting into Sentential Logic](#)

[1.1.3 Compound Sentences \(“AND,” “OR,” and “NOT”\)](#)

[1.1.4 Compound Sentences](#)

[1.1.5 Equivalence, Tautology, and Contradiction](#)

[1.1.6 De Morgan's Laws](#)

[1.1.7 Tautology](#)

[1.1.8 Logical Sentences from Truth Tables: DNF and CNF](#)

[1.1.9 Disjunctive and Conjunctive Normal Forms](#)

[Problems](#)

[1.2 Conditional and Biconditional Connectives](#)

[1.2.1 The Conditional Sentence](#)

[1.2.2 Understanding the Conditional Sentence](#)

[1.2.3 Converse, Inverse, and the Contrapositive](#)

[1.2.4 Law of the Syllogism](#)

[1.2.5 A Useful Equivalence for the Implication](#)

[1.2.6 The Biconditional](#)

[Problems](#)

[1.3 Predicate Logic](#)

[1.3.1 Introduction](#)

[1.3.2 Existential and Universal Quantifiers](#)

[1.3.3 More than One Variable in a Proposition](#)

[1.3.4 Order Matters](#)

[1.3.5 Negation of Quantified Propositions](#)

[1.3.6 Conjunctions and Disjunctions in Predicate Logic](#)

[Problems](#)

[1.4 Mathematical Proofs](#)

[1.4.1 Introduction](#)

[1.4.2 Types of Proofs](#)

[1.4.3 Analysis of Proof Techniques](#)

[1.4.4 Modus Operandi for Proving Theorems](#)

[1.4.5 Necessary and Sufficient Conditions \(NASC\)](#)

[Problems](#)

[1.5 Proofs in Predicate Logic](#)

[1.5.1 Introduction](#)

[1.5.2 Proofs Involving Quantifiers](#)

[1.5.3 Proofs by Contradiction for Quantifiers](#)

[1.5.4 Unending Interesting Properties of Numbers](#)

[1.5.5 Unique Existential Quantification \$\exists!\$](#)

[Problems](#)

[1.6 Proof by Mathematical Induction](#)

[1.6.1 Introduction](#)

[1.6.2 Mathematical Induction](#)

[1.6.3 Strong Induction](#)

[Problems](#)

[Chapter 2: Sets and Counting](#)

[2.1 Basic Operations of Sets](#)

[2.1.1 Sets and Membership](#)

[2.1.2 Universe, Subset, Equality, Complement, Empty Set](#)

[2.1.3 Union, Intersection, and Difference of Sets](#)

[2.1.4 Venn Diagrams of Various Sets](#)

[2.1.5 Relation Between Sets and Logic](#)

[2.1.6 De Morgan's Laws for Sets](#)

[2.1.7 Sets, Logic, and Arithmetic](#)

[Problems](#)

[2.2 Families of Sets](#)

[2.2.1 Introduction](#)

[2.2.2 Extended Laws for Sets](#)

[2.2.3 Topologies on a Set](#)

[Problems](#)

[2.3 Counting: The Art of Enumeration](#)

[2.3.1 Introduction](#)

[2.3.2 Multiplication Principle](#)

[2.3.3 Permutations](#)

[2.3.4 Permutations of Racers](#)

[2.3.5 Distinguishable Permutations](#)

[2.3.6 Combinations](#)

[2.3.7 The Pigeonhole Principle](#)

[Problems](#)

[2.4 Cardinality of Sets](#)

[2.4.1 Introduction](#)

[2.4.2 Cardinality, Equivalence, Finite, and Infinite](#)

[2.4.3 Major Result Comparing Sizes of Finite Sets](#)

[2.4.4 Countably Infinite Sets](#)

[Problems](#)

[2.5 Uncountable Sets](#)

[2.5.1 Introduction](#)

[2.5.2 Cantor's Surprise](#)

[Problems](#)

[2.6 Larger Infinities and the ZFC Axioms](#)

[2.6.1 Cantor's Discovery of Larger Sets](#)

[2.6.2 The Cantor–Bernstein Theorem](#)

[2.6.3 The Continuum Hypothesis](#)

[2.6.4 Need for Axioms in Set Theory](#)

[2.6.5 The Zermelo–Fraenkel Axioms](#)

[2.6.6 Comments on the AC](#)

[2.6.7 Axiom of Choice \$\Leftrightarrow\$ Well-Ordering Principle](#)

[Problems](#)

[Chapter 3: Relations](#)

[3.1 Relations](#)

[3.1.1 Introduction and the Cartesian Product](#)

[3.1.2 Relations](#)

[3.1.3 Visualization of Relations with Directed Graphs](#)

[3.1.4 Domain and Range of a Relation](#)

[3.1.5 Inverses and Compositions](#)

[3.1.6 Composition of Relations](#)

[Problems](#)

[3.2 Order Relations](#)

[3.2.1 Let There Be Order](#)

[3.2.2 Total Order and Symmetric Relations](#)

[3.2.3 Symmetric Relation](#)

[3.2.4 Hasse Diagrams and Directed Graphs](#)

[3.2.5 Upper Bounds, Lower Bounds, glb, and lub](#)

[Problems](#)

[3.3 Equivalence Relations](#)

[3.3.1 Introduction](#)

[3.3.2 Partition of a Set](#)

[3.3.3 The Partitioning Property of the Equivalence Relation](#)

[3.3.4 Counting Partitions](#)

[3.3.5 Modular Arithmetic](#)

[Problems](#)

[3.4 The Function Relation](#)

[3.4.1 Introduction](#)

[3.4.2 Relation Definition of a Function](#)

[3.4.3 Composition of Functions](#)

[3.4.4 Inverse Functions](#)

[Problems](#)

[3.5 Image of a Set](#)

[3.5.1 Introduction](#)

[3.5.2 Images of Intersections and Unions](#)

[Problems](#)

[Chapter 4: The Real and Complex Number Systems](#)

[4.1 Construction of the Real Numbers](#)

[4.1.1 Introduction](#)

[4.1.2 The Building of the Real Numbers](#)

[4.1.3 Construction of the Integers: \$\mathbb{N} \rightarrow \mathbb{Z}\$](#)

[4.1.4 Construction of the Rationals: \$\mathbb{Z} \rightarrow \mathbb{Q}\$](#)

[4.1.5 How to Define Real Numbers](#)

[4.1.6 How Dedekind Cuts Define the Real Numbers](#)

[4.1.7 Arithmetic of the Real Numbers](#)

[Problems](#)

[4.2 *The* Complete Ordered Field: The Real Numbers](#)

[4.2.1 Introduction](#)

[4.2.2 Arithmetic Axioms for Real Numbers](#)

[4.2.3 Conventions and Notation](#)

[4.2.4 Fields Other than \$\mathbb{R}\$](#)

[4.2.5 Ordered Fields](#)

[4.2.6 The Completeness Axiom](#)

[4.2.7 Least Upper Bound and Greatest Lower Bounds](#)

[Problems](#)

[4.3 Complex Numbers](#)

[4.3.1 An Introductory Tale](#)

[4.3.2 Complex Numbers](#)

[4.3.3 Complex Numbers as an Algebraic Field](#)

[4.3.4 Imaginary Numbers and Two Dimensions](#)

[4.3.5 Polar Coordinates](#)

[4.3.6 Complex Exponential and Euler's Theorem](#)

[4.3.7 Complex Variables in Polar Form](#)

[4.3.8 Basic Arithmetic of Complex Numbers](#)

[4.3.9 Roots and Powers of a Complex Number](#)

[Problems](#)

[Chapter 5: Topology](#)

[5.1 Introduction to Graph Theory](#)

[5.1.1 Introduction](#)

[5.1.2 Glossary of Important Concepts in Graph Theory](#)

[5.1.3 Euler Paths and Circuits](#)

[5.1.4 Return to Konigsberg](#)

[5.1.5 Weighted Graphs](#)

[5.1.6 Euler's Characteristic for Planar Graphs](#)

[Problems](#)

[5.2 Directed Graphs](#)

[5.2.1 Introduction](#)

[5.2.2 Tournament Graphs \(Dominance Graphs\)](#)

[5.2.3 Dominance Graphs in Social Networking](#)

[5.2.4 PageRank System](#)

[5.2.5 Dynamic Programming](#)

[Problems](#)

[5.3 Geometric Topology](#)

[5.3.1 Introduction](#)

[5.3.2 Topological Equivalent Objects](#)

[5.3.3 Homeomorphisms as Equivalence Relations](#)

[5.3.4 Topological Invariants](#)

[5.3.5 Euler Characteristic for Graphs, Polyhedra, and Surfaces](#)

[5.3.6 The Euler Characteristic of a Surface](#)

[Problems](#)

[5.4 Point-Set Topology on the Real Line](#)

[5.4.1 Introduction](#)

[5.4.2 Interior, Exterior, and Boundary of a Set](#)

[5.4.3 Interiors, Boundaries, and Exteriors of Common Sets](#)

[5.4.4 Limit Points](#)

[5.4.5 Closed Sets Contain Their Limit Points](#)

[5.4.6 Topological Spaces](#)

[5.4.7 Calculus Without Topology Is No Calculus](#)

[Problems](#)

Chapter 6: Algebra

6.1 Symmetries and Algebraic Systems
