The Wiley Series in Intelligent Signal and Data Processing

Intelligent Data Analysis

From Data Gathering to
Data Comprehension

EDITED BY

Deepak Gupta
Siddhartha Bhattacharyya
Ashish Khanna
Kalpna Sagar

WILEY

Table of Contents

[Cover](#)

[List of Contributors](#)

[Series Preface](#)

[Preface](#)

[1 Intelligent Data Analysis: Black Box Versus White Box Modeling](#)

[1.1 Introduction](#)

[1.2 Interpretation of White Box Models](#)

[1.3 Interpretation of Black Box Models](#)

[1.4 Issues and Further Challenges](#)

[1.5 Summary](#)

[References](#)

[2 Data: Its Nature and Modern Data Analytical Tools](#)

[2.1 Introduction](#)

[2.2 Data Types and Various File Formats](#)

[2.3 Overview of Big Data](#)

[2.4 Data Analytics Phases](#)

[2.5 Data Analytical Tools](#)

[2.6 Database Management System for Big Data Analytics](#)

[2.7 Challenges in Big Data Analytics](#)

[2.8 Conclusion](#)

[References](#)

[3 Statistical Methods for Intelligent Data Analysis: Introduction and Various Concepts](#)

[3.1 Introduction](#)

[3.2 Probability](#)

[3.3 Descriptive Statistics](#)

[3.4 Inferential Statistics](#)

[3.5 Statistical Methods](#)

[3.6 Errors](#)

[3.7 Conclusion](#)

[References](#)

[4 Intelligent Data Analysis with Data Mining: Theory and Applications](#)

[4.1 Introduction to Data Mining](#)

[4.2 Data and Knowledge](#)

[4.3 Discovering Knowledge in Data Mining](#)

[4.4 Data Analysis and Data Mining](#)

[4.5 Data Mining: Issues](#)

[4.6 Data Mining: Systems and Query Language](#)

[4.7 Data Mining Methods](#)

Evaluation Only. Created with Aspose.Words. Copyright 2003-2026 Aspose Pty Ltd.

[4.8 Data Exploration](#)

[4.9 Data Visualization](#)

[4.10 Probability Concepts for Intelligent Data Analysis \(IDA\)](#)

[Reference](#)

[5 Intelligent Data Analysis: Deep Learning and Visualization](#)

[5.1 Introduction](#)

[5.2 Deep Learning and Visualization](#)

[5.3 Data Processing and Visualization](#)

[5.4 Experiments and Results](#)

[5.5 Conclusion](#)

[References](#)

[6 A Systematic Review on the Evolution of Dental Caries Detection Methods and Its Significance in Data Analysis Perspective](#)

[6.1 Introduction](#)

[6.2 Different Caries Lesion Detection Methods and Data Characterization](#)

[6.3 Technical Challenges with the Existing Methods](#)

[6.4 Result Analysis](#)

[6.5 Conclusion](#)

[Acknowledgment](#)

[References](#)

[7 Intelligent Data Analysis Using Hadoop Cluster – Inspired MapReduce Framework and Association Rule Mining on Educational Domain](#)

[7.1 Introduction](#)

[7.2 Learning Analytics in Education](#)

[7.3 Motivation](#)

[7.4 Literature Review](#)

[7.5 Intelligent Data Analytical Tools](#)

[7.6 Intelligent Data Analytics Using MapReduce Framework in an Educational Domain](#)

[7.7 Results](#)

[7.8 Conclusion and Future Scope](#)

[References](#)

[8 Influence of Green Space on Global Air Quality Monitoring: Data Analysis Using K-Means Clustering Algorithm](#)

[8.1 Introduction](#)

[8.2 Material and Methods](#)

[8.3 Results](#)

[8.4 Quantitative Analysis](#)

[8.5 Discussion](#)

[8.6 Conclusion](#)

[References](#)

[9 IDA with Space Technology and Geographic Information System](#)

[9.1 Introduction](#)

[9.2 Geospatial Techniques](#)

[9.3 Comparative Analysis](#)

[9.4 Conclusion](#)

[References](#)

[10 Application of Intelligent Data Analysis in Intelligent Transportation System Using IoT](#)

[10.1 Introduction to Intelligent Transportation System \(ITS\)](#)

[10.2 Issues and Challenges of Intelligent Transportation System \(ITS\)](#)

[10.3 Intelligent Data Analysis Makes an IoT-Based Transportation System Intelligent](#)

[10.4 Intelligent Data Analysis for Security in Intelligent Transportation System](#)

[10.5 Tools to Support IDA in an Intelligent Transportation System](#)

[References](#)

[11 Applying Big Data Analytics on Motor Vehicle Collision Predictions in New York City](#)

[11.1 Introduction](#)

[11.2 Materials and Methods](#)

[11.3 Classification Algorithms and K-Fold Validation Using Data Set Obtained from NYPD \(2012–2017\)](#)

[11.4 Results](#)

[11.5 Discussion](#)

[11.6 Conclusion](#)

[References](#)

[12 A Smart and Promising Neurological Disorder Diagnostic System: An Amalgamation of Big Data, IoT, and Emerging Computing Techniques](#)

[12.1 Introduction](#)

[12.2 Statistics of Neurological Disorders](#)

[12.3 Emerging Computing Techniques](#)

[12.4 Related Works and Publication Trends of Articles](#)

[12.5 The Need for Neurological Disorders Diagnostic System](#)

[12.6 Conclusion](#)

[References](#)

[13 Comments-Based Analysis of a Bug Report Collection System and Its Applications](#)

[13.1 Introduction](#)

[13.2 Background](#)

[13.3 Related Work](#)

[13.4 Data Collection Process](#)

[13.5 Analysis of Bug Reports](#)

[13.6 Threats to Validity](#)

[13.7 Conclusion](#)

[References](#)

Notes

14 Sarcasm Detection Algorithms Based on Sentiment Strength

14.1 Introduction

14.2 Literature Survey

14.3 Experiment

14.4 Results and Evaluation

14.5 Conclusion

References

Notes

15 SNAP: Social Network Analysis Using Predictive Modeling

15.1 Introduction

15.2 Literature Survey

15.3 Comparative Study

15.4 Simulation and Analysis

15.5 Conclusion and Future Work

References

16 Intelligent Data Analysis for Medical Applications

16.1 Introduction

16.2 IDA Needs in Medical Applications

16.3 IDA Methods Classifications

16.4 Intelligent Decision Support System in Medical Applications

16.5 Conclusion

References

17 Bruxism Detection Using Single-Channel C4-A1 on Human Sleep S2 Stage Recording

17.1 Introduction

17.2 History of Sleep Disorder

17.3 Electroencephalogram Signal

17.4 EEG Data Measurement Technique

17.5 Literature Review

17.6 Subjects and Methodology

17.7 Data Analysis of the Bruxism and Normal Data Using EEG Signal

17.8 Result

17.9 Conclusions

Acknowledgments

References

18 Handwriting Analysis for Early Detection of Alzheimer's Disease

18.1 Introduction and Background

18.2 Proposed Work and Methodology

18.3 Results and Discussions

[18.4 Conclusion](#)

[References](#)

[Index](#)

[End User License Agreement](#)

List of Tables

Chapter 2

[Table 2.1 Schema of an employee table in a broker company.](#)

[Table 2.2 Data storage measurements.](#)

[Table 2.3 Comparison of different data analytic tools.](#)

[Table 2.4 Comparison between SQL and NoSQL.](#)

Chapter 4

[Table 4.1 Dissimilarities between data and knowledge.](#)

Chapter 6

[Table 6.1 Global DMFT trends for 12-year-old children \[81–83\].](#)

[Table 6.2 Code meaning.](#)

Chapter 7

[Table 7.1 Educational data set \[37\].](#)

[Table 7.2 Synthesized educational data set \[38\].](#)

[Table 7.3 The data set for course selection.](#)

[Table 7.4 Output of Map reduce task.](#)

[Table 7.5 Best rules found by Apriori.](#)

Chapter 8

[Table 8.1 Air quality categories \(annual mean ambient defined by WHO\).](#)

[Table 8.2 Categorization of the difference of green space area percentage dur...](#)

[Table 8.3 Analysis of variance \(ANOVA\) statistics table.](#)

Chapter 9

[Table 9.1 NoSQL database types.](#)

[Table 9.2 NoSQL database types.](#)

[Table 9.3 NoSQL database types.](#)

Chapter 10

[Table 10.1 Objects, statistical techniques, and graphs supported by R program...](#)

Chapter 11

[Table 11.1 Illustration of data set attributes.](#)

[Table 11.2 Categorized vehicle groups.](#)

[Table 11.3 Description of classification algorithms and functionalities.](#)

[Table 11.4 Comparison of classifier results.](#)

[Table 11.5 Analyzed \$p\$ -value test results.](#)

Chapter 12

[Table 12.1 Difference between neurological and psychological disorders.](#)

[Table 12.2 Publications details along with citations used in the study.](#)

Chapter 13

[Table 13.1 Comparison of previous studies of data extraction.](#)

[Table 13.2 Categories of error and its significant keywords.](#)

[Table 13.3 Frequent words for severe and nonsevere bugs.](#)
