DEEP LEARNING IN QUANTITATIVE FINANCE

ANDREW GREEN

WILEY

Table of Contents

[Cover](#)

[Table of Contents](#)

[Title Page](#)

[Copyright](#)

[Dedication](#)

[Acknowledgements](#)

[Part One: Introducing Deep Neural Networks](#)

[Chapter 1: Introduction](#)

[1.1 WHAT THIS BOOK IS ABOUT](#)

[1.2 THE RISE OF AI](#)

[1.3 THE PROMISE OF AI IN QUANTITATIVE FINANCE](#)

[1.4 PRACTICALITIES](#)

[1.5 READING THIS BOOK](#)

[NOTES](#)

[Part Two: Foundations](#)

[Chapter 2: Feedforward Neural Networks](#)

[2.1 INTRODUCING NEURAL NETWORKS](#)

[2.2 REGRESSION AND CLASSIFICATION](#)

[2.3 ACTIVATION FUNCTIONS](#)

[2.4 THE UNIVERSAL FUNCTION APPROXIMATION THEOREM](#)

[2.5 CONCLUSIONS](#)

[NOTES](#)

[Chapter 3: Training Neural Networks](#)

[3.1 BACKPROPAGATION AND ADJOINT ALGORITHMIC DIFFERENTIATION](#)

[3.2 DATA PREPARATION AND SCALING](#)

[3.3 WEIGHT INITIALISATION](#)

[3.4 THE CHOICE OF LOSS FUNCTION](#)

[3.5 OPTIMISATION ALGORITHMS](#)

[3.6 COMMON TRAINING PROBLEMS](#)

[3.7 BATCH NORMALISATION](#)

[3.8 EVALUATION AND VALIDATION](#)

[3.9 SOBOLEV TRAINING: USING FUNCTION DERIVATIVES](#)

[3.10 CONCLUSIONS](#)

[NOTES](#)

[Chapter 4: Regularisation](#)

[4.1 INTRODUCTION: REGULARISATION AND GENERALISATION](#)

[4.2 WEIGHT DECAY](#)

[4.3 EARLY STOPPING](#)

[4.4 ENSEMBLE METHODS AND DROPOUT](#)

[4.5 DATA AUGMENTATION](#)

[4.6 OTHER REGULARISATION METHODS](#)

[4.7 CONCLUSIONS: REGULARISATION STRATEGY](#)

[NOTE](#)

[Chapter 5: Hyperparameter Optimisation](#)

[5.1 INTRODUCTION](#)

[5.2 MANUAL](#)

[5.3 GRID SEARCH](#)

[5.4 RANDOM SEARCH](#)

[5.5 BAYESIAN OPTIMISATION](#)

[5.6 BANDIT-BASED](#)

[5.7 POPULATION-BASED TRAINING \(PBT\)](#)

[5.8 CONCLUSION](#)

[Chapter 6: Convolutional Neural Networks](#)

[6.1 INTRODUCTION](#)

[6.2 CONVOLUTIONS](#)

[6.3 DOWNSAMPLING](#)

[6.4 DATA AUGMENTATION](#)

[6.5 TRANSFER LEARNING: USING PRE-TRAINED NETWORKS](#)

[6.6 VISUALISING FEATURES](#)

[6.7 FAMOUS CNNs](#)

[6.8 CONCLUSIONS ON CNNs](#)

[NOTE](#)

[Chapter 7: Sequence Models](#)

[7.1 INTRODUCING SEQUENCE MODELS](#)

[7.2 RECURRENT NEURAL NETWORKS](#)

[7.3 NEURAL NATURAL LANGUAGE PROCESSING](#)

[7.4 CONCLUSIONS ON SEQUENCE MODELS](#)

[Chapter 8: Autoencoders](#)

[8.1 INTRODUCTION](#)

[8.2 AUTOENCODERS AND SINGULAR-VALUED DECOMPOSITION](#)

[8.3 SHALLOW AND DEEP AUTOENCODERS](#)

[8.4 REGULARISED AND SPARSE AUTOENCODERS](#)

[8.5 DENOISING AUTOENCODERS](#)

[8.6 AUTOENCODERS AND GENERATIVE MODELS](#)

[8.7 CONCLUSION](#)

[NOTE](#)

[Chapter 9: Generative Models](#)

[9.1 INTRODUCTION](#)

[9.2 EVALUATING GENERATIVE MODEL PERFORMANCE](#)

[9.3 ENERGY-BASED MODELS \(EBMs\)](#)

[9.4 VARIATIONAL AUTOENCODERS \(VAEs\)](#)

[9.5 GENERATIVE ADVERSARIAL NETWORKS \(GANs\)](#)

[9.6 LATENT DIFFUSION MODELS \(LDMs\)](#)

[9.7 CONCLUSIONS ON GENERATIVE MODELS](#)

[NOTES](#)

[Chapter 10: Deep Reinforcement Learning](#)

[10.1 INTRODUCTION](#)

[10.2 KEY CONCEPTS IN REINFORCEMENT LEARNING](#)

[10.3 MARKOV DECISION PROCESSES \(MDPs\) AND THE BELLMAN EQUATIONS](#)

[10.4 DYNAMIC PROGRAMMING AND POLICY SEARCH](#)

[10.5 MONTE CARLO METHODS FOR RL](#)

[10.6 TD LEARNING](#)

[10.7 DEEP Q NETWORKS \(DQNs\)](#)

[10.8 POLICY GRADIENT](#)

[10.9 ACTOR–CRITIC METHODS](#)

[10.10 CONCLUSIONS](#)

[NOTES](#)

[Part Three: Applications](#)

[Chapter 11: Derivative Valuation Using Neural Networks](#)

[11.1 INTRODUCTION](#)

[11.2 DERIVATIVE VALUATION USING NEURAL NETWORKS TRAINED AS NON-PARAMETRIC MODELS](#)

[11.3 DERIVATIVE VALUATION FUNCTION APPROXIMATION](#)

[NOTES](#)

[Chapter 12: High-Dimensional PDE and BSDE Solvers](#)

[12.1 INTRODUCTION](#)

[12.2 DEEP GALERKIN METHOD \(DGM\)](#)

[12.3 DEEP BSDE SOLVERS](#)

[12.4 PROJECTION AND MARTINGALE SOLVERS](#)

[12.5 DEEP PATH-DEPENDENT PDEs \(DPPDE\)](#)

[12.6 PHYSICS-INFORMED NEURAL NETWORKS \(PINNs\)](#)

[12.7 DEEP BACKWARD DYNAMIC PROGRAMMING \(DBDP\)](#)

[12.8 DEEP SPLITTING \(DS\)](#)

[12.9 CONCLUSIONS](#)

[NOTES](#)

[Chapter 13: Deep Monte Carlo and Optimal Stopping](#)

[13.1 INTRODUCTION](#)

[13.2 DEEP MONTE CARLO](#)

[13.3 DEEP OPTIMAL STOPPING AND APPLICATIONS](#)

[13.4 CONCLUSION: DEEP MONTE CARLO](#)

[NOTES](#)

[Chapter 14: Static Replication Using Neural Networks](#)

[14.1 \(SEMI\) STATIC REPLICATION](#)

[14.2 NEURAL STATIC REPLICATION](#)

[14.3 CONCLUSIONS ON NEURAL STATIC REPLICATION](#)

[Chapter 15: Volatility Surfaces](#)

[15.1 INTRODUCTION](#)

[15.2 VOLATILITY SURFACE MODELS](#)

[15.3 DEEP LEARNING VOLATILITY SURFACES](#)

[15.4 DEEP LOCAL VOLATILITY](#)

[15.5 CONCLUSIONS](#)

[NOTES](#)

[Chapter 16: Model Calibration](#)

[16.1 INTRODUCTION](#)

[16.2 MODEL CALIBRATION](#)

[16.3 CONCLUSION ON DEEP CALIBRATION](#)

[NOTES](#)

[Chapter 17: XVA](#)

[17.1 INTRODUCTION](#)

[17.2 CREDIT CURVE MAPPING](#)

[17.3 EXPOSURE CALCULATION USING NEURAL NETWORKS](#)

[17.4 CONCLUSIONS ON DEEP XVA](#)

[NOTES](#)

[Chapter 18: Generating Realistic Market Data](#)

[18.1 INTRODUCTION AND CLASSICAL METHODS](#)

[18.2 MOTIVATION AND APPLICATIONS OF SYNTHETIC FINANCIAL MARKET DATA](#)

[18.3 TIME-SERIES GENERATION](#)

[18.4 GENERATING HIGHER-DIMENSIONAL MARKET DATA STRUCTURES](#)

[18.5 COMPLETING MARKET DATA: IMPUTING MISSING VALUES](#)

[18.6 CONCLUSIONS: SYNTHETIC MARKET DATA](#)

[NOTES](#)

[Chapter 19: Deep Hedging](#)

[19.1 INTRODUCTION](#)

[19.2 APPROACHES TO DEEP HEDGING](#)

[19.3 DEEP HEDGING EXAMPLES](#)

[19.4 CONCLUSION](#)

[NOTE](#)

[Part Four: The Future](#)

[Chapter 20: The Future Quant](#)

[20.1 CONCLUSION ON DEEP LEARNING](#)

[20.2 THE FUTURE OF QUANTITATIVE ANALYTICS](#)

[20.3 THE FUTURE QUANT](#)

[20.4 A FINAL WORD](#)

[Bibliography](#)

[Index](#)

[End User License Agreement](#)

List of Illustrations

Chapter 1

[Figure 1.1 A timeline of the history of AI.](#)

Chapter 2

[Figure 2.1 A feedforward network with four inputs, three hidden layers of eight neurons and...](#)

[Figure 2.2 Training accuracy and loss from training a two-layer neural network with MNIST.](#)

[Figure 2.3 Distribution of training-set examples for the Black–Scholes model.](#)

[Figure 2.4 Training and test loss as a function of epoch for the Black–Scholes model.](#)

[Figure 2.5 Value error distribution for the Black–Scholes neural network model with ReLU ac...](#)

[Figure 2.6 Sensitivity error distribution for the Black–Scholes neural network model with R...](#)

[Figure 2.7 Value error distribution for the Black–Scholes neural network model with Swish a...](#)

[Figure 2.8 Sensitivity error distribution for the Black–Scholes neural network model with S...](#)

Chapter 3

[Figure 3.1 Forward and backward propagation algorithms for a neural network with \$L\$ layers.](#)

[Figure 3.2 The training loss for the Black–Scholes model example with no scaling, standard...](#)

[Figure 3.3 Training loss as a function of epoch for the basket option model with different ...](#)

[Figure 3.4 Smoothed validation loss as a function of epoch for the basket option model with...](#)

[Figure 3.5 Training accuracy as a function of epoch for the MNIST fashion CNN model with di...](#)

[Figure 3.6 Validation accuracy as a function of epoch for the MNIST fashion CNN model with ...](#)

[Figure 3.7 Four types of loss function suitable for use with regression problems.](#)

[Figure 3.8 Training RMSE as a function of epoch for the basket option model with different ...](#)

[Figure 3.9 Validation RMSE as a function of epoch for the basket option model with differen...](#)

[Figure 3.10 Training accuracy as a function of epoch for the Taiwanese credit card default c...](#)

[Figure 3.11 Validation accuracy as a function of epoch for the Taiwanese credit card default...](#)

[Figure 3.12 Training and validation accuracy as a function of epoch for the MNIST fashion cl...](#)

[Figure 3.13 A visualisation of gradient descent. The contour plot represents the loss surfac...](#)

[Figure 3.14 The validation accuracy of the MNIST fashion CNN trained with 11 different batch...](#)

[Figure 3.15 The validation accuracy of the MNIST fashion CNN trained with nine different lea...](#)

[Figure 3.16 The momentum update step, when the gradient and momentum steps are aligned \(a\) a...](#)

[Figure 3.17 The validation loss for basket option models trained with standard SGD, momentum...](#)

[Figure 3.18 Training accuracy for different optimisation algorithms with the MNIST dataset o...](#)

This document was truncated here because it was created in the Evaluation Mode.
